

ASHRAF ANZIL

Offensive Security | VAPT

+91 79946 20171 | ashrafanzil77@gmail.com | [linkedin.com/in/ashraf-anzil](https://www.linkedin.com/in/ashraf-anzil)
Bangalore, Karnataka, India

SUMMARY

BCA graduate with hands-on training in Vulnerability Assessment & Penetration Testing (VAPT), including network scanning, web application testing, and vulnerability analysis using tools like Nmap, Burp Suite, and Nessus. Skilled in SIEM-based log analysis, incident detection, and Active Directory administration, with practical exposure to SOC operations through simulated scenarios and CTF challenges. Seeking an entry-level VAPT Intern role to apply penetration testing skills and grow in offensive security under real-world guidance.

EDUCATION

Bachelor of Computer Applications (BCA)

East West College of Management (Affiliated to Bangalore University)

CGPA: 6.5/10 | 2021–2024 | Bengaluru, Karnataka

WORK EXPERIENCE

Independent Security Researcher | Bugcrowd | 2025-Present

- Conducted authorized web application and API security testing.
- Reported findings related to SSRF, IDOR, authentication, GraphQL, session management, and information disclosure.
- Practiced reconnaissance, endpoint discovery, access-control testing, and vulnerability validation.
- Documented security findings with reproduction steps and impact details.

Cybersecurity Student Trainee | Offenso Hackers Academy | Oct 2024 - Mar 2025

Kochi, Kerala

- Monitored security events and analysed logs using SIEM platforms across multiple simulated lab environments.
- Investigated alerts and security incidents through a range of simulated SOC scenarios
- Conducted vulnerability assessments using **Nmap, Burp Suite, and Nessus** across various lab environments.
- Participated in multiple Capture the Flag (CTF) challenges focused on incident investigation and cybersecurity fundamentals.
- Administered Linux systems, performed network troubleshooting, and analysed traffic using Wireshark.

PROJECTS

Active Directory Home Lab

- Configured a Windows Server environment with Active Directory Domain Services (AD DS).
- Created users, groups, and Group Policies
- Practiced privilege management and authentication.

Vulnerability Assessment Lab

- Performed security assessments on vulnerable applications (DVWA, Metasploitable).
- Identified SQL Injection, XSS, File Inclusion, and Authentication vulnerabilities.
- Generated security findings and remediation recommendations.

CERTIFICATIONS

Introduction to Artificial Intelligence (AI)	2024
Offenso Certified Security Professional (OCSF)	2025
Networking Basics –Cisco Networking Academy	2025

SKILLS

Technical Skills: Security Monitoring, Log Analysis, Incident Response Fundamentals, Threat Detection, Vulnerability Assessment, Network Security, TCP/IP, DNS, HTTP/HTTPS, Security Event Investigation

SIEM & Security Tools: Splunk, Wireshark, Nmap, Nessus, Burp Suite, Nikto, Metasploit, sqlmap

IT Support: Hardware/Software Troubleshooting, Remote Desktop, User Account Management

Operating Systems: Windows, Linux (Ubuntu/Kali)

Programming: Python (Basic), HTML (Basic)

Concepts: OWASP Top 10, VAPT, Threat Modeling

Languages: English, Malayalam
